## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claims 4-20 are pending. Drawings, 1 sheet, were filed with the application.

The prior art of record does not teach or fairly suggest the claimed process for producing D Or L-dioxolane nucleosides of formulae III – VI.

Several patents disclose processes for the preparation of 1,3-oxathiolane nucleosides via condensation of an 1,3-oxathiolane-2-carboxylic acid ester with a protected silylated base in the presence of a silicon-based Lewis acid, followed by reduction of the ester to the corresponding hydroxymethyl group. See USP 5,663,320; 5,693,787, 5,696,254 for example. These processes use different reactants and reaction mechanism which result in a different product – an oxathiolane versus a dioxolane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amelia A. Owens whose telephone number is
